FOREWORD

This report is prepared to promulgate exchange rate information pursuant to Section 613 of P.L. 87-195 dated September 4, 1961 (22 USC 2363(b)) which grants the Secretary of the Treasury "sole authority to establish for all foreign currencies or credits the exchange rates at which such currencies are to be reported by all agencies of the Government."

The primary purpose of this report is to insure that foreign currency reports prepared by agencies shall be consistent with regularly published Treasury foreign currency reports as to amounts stated in foreign currency units and U.S. dollar equivalents. This includes all foreign currencies in which the U.S. Government has an interest, including receipts and disbursements, accrued revenues and expenditures, authorizations, obligations, receivables and payables, refunds, and similar reverse transaction items.

Exceptions to using the reporting rates as shown in this report are collections and refunds to be valued at specified rates set by international agreements, conversions of one foreign currency into another, foreign currencies sold for dollars and other types of transactions affecting dollar appropriations. See Treasury Circular No. 930, Section 4a (3) of Procedures Memorandum No. 1 for further details.

This quarterly report reflects exchange rates at which foreign currencies can be acquired by the U.S. Government for official expenditures as reported by Disbursing Officers for each post on the last business day of the month prior to the date of the published report. Example: the quarterly report as of December 31 will reflect exchange rates reported by Disbursing Officers as of November 30. If current rates deviate from the rates in this report by 10 percent or more, amendments to this quarterly report will be issued by Treasury. Amendments will also be issued to reflect the establishment of new foreign currencies.

To insure that all reports are translated at uniform exchange rates, these rates should be used by all U.S. Government agencies, except as noted above, to convert foreign currency balances and accomplished reported transactions to U.S. dollar equivalents as of the date of this report and for the ensuing three months. Since the exchange rates reflected in this report are not current rates of exchange, they should not be used to value transactions affecting dollar appropriations.

TREASURY REPORTING RATES OF EXCHANGE

AS OF MARCH 31, 1974

FOREWORD

This report is prepared pursuant to requirements of Section 613 of P.L. 87-195 dated September 4, 1961 (22 USC 2363 (b)) which provides as follows: "The Secretary of the Treasury shall have sole authority to establish for all foreign currencies or credits the exchange rates at which such currencies are to be reported by all agencies of the Government."

The primary purpose of this report is to insure that foreign currency reports prepared by agencies shall be consistent with regularly published Treasury foreign currency reports as to amounts stated in foreign currency units and U.S. dollar equivalents. This includes all foreign currencies in which the U.S. Government has an interest, including receipts and disbursements, accrued revenues and expenditures, authorizations, obligations, receivables and payables, refunds, and similar reverse transaction items.

Exceptions to using the reporting rates as shown in this report are collections and refunds to be valued at specified rates set by international agreements, conversions of one foreign currency into another, foreign currencies sold for dollars and other types of cash transactions. See Treasury Circular No. 930, Section 4a (3) of Procedures Memorandum No. 1 for further details.

This quarterly report reflects exchange rates at which foreign currencies can be acquired by the U.S. Government for official expenditures as reported by Disbursing Officers for each post on the last business day of the month prior to the date of the published report. Example: the quarterly report as of December 31 will reflect exchange rates reported by Disbursing Officers as of November 30. If current rates deviate from the rates in this report by 10 percent or more, amendments to this quarterly report will be issued by Treasury. Amendments will also be issued to reflect the establishment of new foreign currencies.

To insure that all reports are translated at uniform exchange rates, these rates should be used by all U.S. Government agencies, except as noted above, to convert foreign currency balances and accomplished reported transactions to U.S. dollar equivalents as of the date of this report and for the ensuing three months. Since the exchange rates reflected in this report are not current rates of exchange they should not be used to value cash transactions.

TREASURY REPORTING RATES OF EXCHANGE

AS OF DECEMBER 31, 1974

AMENDMENT NO. 5

For reporting purposes use the following rate of exchange for February and March transactions. This rate does not represent the 10 percent change normally required for rate amendements; however, the large rupee transactions effected under the Rupee Settlement Agreement of February 18, 1974 warrant the use of the most appropriate exchange rate.
